Education

• **Bachelor of Technology in Artificial Intelligence & Machine Learning**

Malla Reddy University, Hyderabad

2022-26

CGPA: 8.86

Personal Projects

Emotional Aware Chatbot

An AI-powered chatbot designed to detect and respond to user emotions in real time, enhancing human-computer interaction empathetic conversations.

- Integrated **Natural Language Processing (NLP)** to analyze user inputs and classify emotions such as happiness, sadness, anger, and fear.
- Implemented a **sentiment analysis model** using pretrained NLP libraries for accurate emotional detection.
- **Technologies Used:** Python, NLTK/TextBlob or Hugging Face Transformers, Machine Learning, Flask

Skin disease Detection

This is a deep learning-based project designed to detect various skin conditions using Convolutional Neural Networks (CNN).

- Enables quick and accurate diagnosis through image upload and automated analysis.
- Trained on a large dataset of skin condition images to improve detection accuracy.
- Enhances accessibility to preliminary skin assessments.
- **Technologies Used:** Python, TensorFlow/Keras (CNN), Deep Learning

Film Fusion

Film Fusion is a Python-driven web application that provides comprehensive info and recommendations for OTT platforms.

- Built a recommendation system by collecting and processing extensive raw data on movies.
- Integrated a user-friendly interface for seamless interaction and exploration.
- Enabled real-time suggestions based on user preferences and historical data.
- Technology Used: Python, Reactjs.

Experience

AI/ML Intern – Synergycom

May 2026 – Present

- Developed Python-based applications integrating REST APIs for real-time data processing
- Worked with LLM APIs (e.g., OpenAI API) to build intelligent text-based features
- Designed and optimized prompts to improve response accuracy and relevance
- Built backend services using FastAPI for handling API requests efficiently
- Implemented error handling and response validation for robust API communication
- Collaborated with team members to design scalable AI-driven solutions

Technical Skills and Interests

Languages: Python, Java, HTML, CSS, JavaScript

Libraries: Python Libraries, ReactJs

Web Dev Tools: VScode, Github

Databases: MongoDB, Relational Database(mysql)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering, Artificial Intelligence, Machine learning

Areas of Interest: Artificial Intelligence, Machine Learning, Natural Language Processing (NLP), Backend Development, Full Stack Development

Soft Skills: Problem Solving, Self-learning, Communication.

Honors And Achievements

- Google Developer Student Certification by GDSC .
- Participated in IES.
- Certified from the AWS Academy.
- NPTEL Programming in Java
